

Healthcare Dashboard Documentation

1. Project Overview

This dashboard summarizes healthcare financial and patient data, focusing on **charges** across different health conditions and demographics. It was built in **Excel** and exported to PDF for reporting. The goal is to highlight how medical conditions, lifestyle factors, and demographics influence healthcare costs.

2. Dashboard Components

◆ Diabetes Status vs Charges

- Categories: **Normal, Prediabetes, Diabetes, Unknown**
- Insight: Charges increase significantly for patients with **Diabetes**, while **Normal** status shows the lowest charges.
- Example Percentage:
 - Diabetes patients contribute ~40% of total charges.
 - Prediabetes ~20%, Normal ~30%, Unknown ~10%.

◆ State ID vs Charges

- Each **State ID (R1011–R1026)** represents a region.
- Insight: Charges vary widely by state, with some states contributing disproportionately to overall healthcare costs.
- Example Percentage:
 - Top 3 states contribute ~50% of total charges.

◆ Cancer History vs Smoker

- Categories: **Yes/No for Cancer History vs Smoker status.**
- Insight: Patients with a **cancer history who smoke** show the highest charges.
- Example Percentage:
 - Cancer + Smoker group ~35% of charges.
 - Cancer + Non-Smoker ~25%.
 - No Cancer + Smoker ~20%.
 - No Cancer + Non-Smoker ~20%.

◆ Charges by Weight Status

- Categories: **Normal Weight, Overweight, Obesity, Underweight.**
- Insight: **Obesity** drives the highest charges, followed by **Overweight.**
- Example Percentage:
 - Obesity ~40% of charges.
 - Overweight ~30%.
 - Normal Weight ~25%.
 - Underweight ~5%.

3. Key Terms & Measures

- **Total Charges** = SUM(Charges)
- **Condition Contribution %** = (Condition Charges ÷ Total Charges) × 100
- **Regional Contribution %** = (State Charges ÷ Total Charges) × 100
- **Lifestyle Impact %** = (Smoker/Weight Status Charges ÷ Total Charges) × 100

4. Outcomes

-  Identified **high-risk groups** (Diabetes, Obesity, Cancer + Smoker).
-  Regional disparities in healthcare costs.
-  Lifestyle factors strongly influence charges.
-  Recruiter-ready portfolio skills: Excel dashboards, pivot tables, percentage calculations, and healthcare analytics.
